

Your rate plan options: What's changed and what has not

You have choices when it comes to your rate plan. We want you to understand your rate plan options, so you can pick the plan that best fits your needs.

Your Plan: Fixed Energy Charge Plan

Your current plan is the Fixed Energy Charge Plan.

On the Fixed Energy Charge Plan, the price you pay for energy is the same no matter the time of day or day of week. You are assigned to one of three usage tiers based on your average energy use throughout the year – Tier 1 for low usage, Tier 2 for moderate usage, Tier 3 for larger usage. The higher the tier the more you pay for energy.

Each year with your November bill, your average monthly usage will be automatically reviewed to determine if you are on the right tier. Check your monthly bill for updates about your average monthly usage and to track your progress.

Depending on your energy use, your bill on the Fixed Energy Charge Plan could be higher than if you were on another rate plan.

Your Options

Other plans you can choose are:

- Time-of-Use 4pm-7pm Weekdays
- Time-of-Use 4pm-7pm Weekdays with Demand Charge

These time-of-use plans recently changed. The on-peak period, when energy charges are higher, was reduced from five hours to three. On-peak hours for these plans are now 4pm to 7pm weekdays.

Medium to large energy users (Tier 2 & 3) who can minimize their energy use during 4-7 pm weekdays typically save on the Time-of-Use 4pm-7pm Weekdays or Time-of-Use 4pm-7pm Weekdays with Demand Charge.

Visit aps.com/plans to learn more about these plans and see if they may be a good fit for you. You can also access our free [online plan comparison tool](#). This tool looks at your past 3 to 12 months of energy usage to show you what you would have paid on all three plans, and whether you may have saved money on a different plan. This lowest-cost plan recommendation also is available on your monthly bill statement. Look for the blue box on pages 1 and 3.

Managing Your Energy Use

You can save money on the Fixed Energy Charge Plan by reducing your overall energy use any time of day and any day of the week. Switching to LED bulbs or adjusting your thermostat can help. Visit aps.com/fixedplan for more tips on how to save money on this plan.

Sincerely,
APS Customer Care
