

# Would a different rate plan save you money?

## Compare rate plans and see if you can save.

Your rate plan options allow you to pick the plan that best fits your needs. For many, that comes down to a simple question: Which plan would save you the most money?

There's an easy way for eligible customers to find out what they would have saved on the available plans. Simply log in to your [aps.com](https://aps.com) account and visit our free online plan comparison tool.

### How the plan comparison tool works

The tool looks back at up to 12 months of your energy use. It uses this information to estimate what you might have paid over that same period on different rate plans and tells you which plan could have saved you the most money. The tool's calculations and estimated savings do not account for things such as bill adjustments, mid-cycle updates, or one-time charges/credits and, therefore, may not match your historic bills. The tool cannot guarantee future savings because it does not account for adjustments to rates/taxes, changes in weather, or changes you make to how you use energy. In fact, since your energy use changes over time, the plan that is estimated to save you the most money can change from month to month.

### It's on your bill, too

Your lowest-cost plan also is available on your monthly bill statement. Look for the blue box on pages 1 and 3 that says "Your Monthly Plan Comparison."

### Check back often

The way you use energy can change over time, so the plan that can save you the most can also change. Check your monthly bill or use the comparison tool regularly to see if the lowest-cost plan changes. And, you can switch plans at any time and as often as you'd like.

**Plan comparison**

Your current plan is **Time-of-Use 4pm-7pm Weekdays**, but you could save more money on the plan below.

The data below is based off the 3 to 12 months of your historical energy use since your meter was reprogrammed. Click "see monthly view" for monthly comparisons and savings estimates.

Understanding your rate plan options

3 Main Rate Plan Options

- Fixed Energy Charge Plan
- Time-of-Use 4pm-7pm Weekdays Plan
- Time-of-Use 4pm-7pm Weekdays with Demand Charge Plan

**YOUR LOWEST-COST PLAN**

Time-of-Use 4pm-7pm Weekdays with Demand Charge	Estimated cumulative savings	Estimated cumulative cost	Estimated highest bill	Estimated lowest bill
	\$77.23	\$1,370.82	\$393.61	\$274.38

I have reviewed the plan information and I would like to select the **Time-of-Use 4pm-7pm Weekdays with Demand Charge** plan.

**CURRENT PLAN**

Time-of-Use 4pm-7pm Weekdays	Cumulative cost	Highest bill	Lowest bill
	\$1,448.05	\$415.41	\$270.40

**Other eligible plans**

Fixed Energy Charge Plan - Tier 3	Estimated cumulative additional cost	Estimated cumulative cost	Estimated highest bill	Estimated lowest bill
	\$9.40	\$1,457.45	\$414.89	\$268.98

I have reviewed the plan information and I would like to select the **Fixed Energy Charge Plan - Tier 3** plan.

**How the plan comparison tool works**

The tool looks back at up to 12 months of your energy use. It uses this information to estimate what you might have paid over that same period on different service plans and tells you which plan could have saved you the most money. The tool's calculations and estimated savings do not account for things such as bill adjustments, mid-cycle updates, or one-time charges/credits and, therefore, may not match your historic bills. **The tool cannot guarantee future savings because it does not account for adjustments to rates/taxes, changes in weather, or changes you make to how you use energy. In fact, since your energy use changes over time, the plan that is estimated to save you the most money can change from month to month.** We encourage you to compare plans to ensure you are on the plan that is right for you. For additional information, please call us at (800) 253-9405. \*See a monthly view of the tool's comparison of your estimated charges on eligible service plans using 3 to 12 months of your historical energy use.
